Description

We are excited to present our latest update, the C2NER v2 touchscreen! Originally released in Golf R application only, we have now expanded our handheld programmer to include the most popular VAG engines including 2.8L 12v

Now supporting the most popular Bosch ECUs: ME7.1.1, ME7.5.5, ME9.1, MED9.5.10, TFSI, ME9.5 FSI, MED9.1, MED9.1.5 TFSI, MED9.5 FSI and Diesel EDC 15/16.

One of the exciting new features of our C2NER packages is that it now includes the option for 2 FREE revisions instead of a 2nd file. Consider these "tweaks" to really dial in your tune remotely!!!

We are now offering a 14-day money back guarantee! If you are not happy with the software or device within this time, you can request an RMA to get a refund minus the shipping. Please read our updated terms and conditions for further details. Please feel free to call or shoot us an e-mail.

STAGE 1

Combine this Flashload with [36# Injectors](#) and our [95mm MAF housing](#) for a plug'n play tuning solution for MK4 12V equipped cars. Supports up to 350hp.

*Stage 1 uses Stock Compression and Stock Fuel Pump.

STAGE 2

Similar to Stage 1, combine this Flashload with [42# Injectors](#) and our [95mm MAF housing](#) for a plug'n play tuning solution for MK4 12V equipped cars. Supports up to 400hp.

*With Stage 2, we suggest using a [C2 SS Low CR spacer](#) and a [C2 MK4 Fuel Pump kit](#).

STAGE 3

Same as stage 2, combine this Flashload with [60# injectors](#) and our [95mm MAF housing](#) for a plug'n play tuning solution for MK4 12V equipped cars. Supports up to 500hp.

*This is a High Performance software tune that requires a fully engineered engine system that is capable of handling the power. Fully BUILT bottom end is required, as well as supplementary fueling system components.

*If ordering a C2NER device with your software, your ECU MUST be stock.

If you currently have other performance software on your ECU, we can flash it back to stock but you must send it in.*
